THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Behaviour Change Techniques: Evidence Map

Research & Evidence · RESEARCH · Version 1.0

An evidence map linking common behaviour change techniques to the outcomes they reliably influence.

Overview

This evidence map cuts through the jargon of behaviour change frameworks to show which techniques have robust support for which outcomes, helping teams design interventions that are more likely to work.

What's inside

A clear summary of the evidence and its strength
- Key findings translated into practical implications
- An honest appraisal of limitations and gaps
- A full reference list for further reading

How to use it

Use the implications section to inform planning and commissioning conversations, and cite the references directly when you need to evidence a decision. Treat the limitations section as honestly as the findings.

About this collection

This document belongs to the Research & Evidence collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
