THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Building a Population Health Dashboard

Data & Digital Health · GUIDE · Version 1.0

A practical guide to designing population health dashboards people actually use.

Overview

Too many dashboards are built and abandoned. This guide covers metric selection, layout, and governance so your dashboard drives decisions rather than gathering dust.

What's inside

A plain-language overview you can read in one sitting
• Step-by-step guidance with decision points called out
• Worked examples drawn from real community practice
• A one-page summary to keep at your desk

How to use it

Read it through once to orient yourself, then return to the relevant section when you need it. Share the one-page summary with colleagues who need the headlines rather than the detail.

About this collection

This document belongs to the Data & Digital Health collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
