THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Climate Change & Population Health: Local Briefing

Research & Evidence · RESEARCH · Version 1.0

A briefing on the local population health risks of climate change and adaptation priorities.

Overview

From heat-health planning to air quality and flooding, this briefing summarises the population health risks of a changing climate and the adaptation actions within local teams' control.

What's inside

A clear summary of the evidence and its strength
- Key findings translated into practical implications
- An honest appraisal of limitations and gaps
- A full reference list for further reading

How to use it

Use the implications section to inform planning and commissioning conversations, and cite the references directly when you need to evidence a decision. Treat the limitations section as honestly as the findings.

About this collection

This document belongs to the Research & Evidence collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
