THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Data Quality Checklist for Surveillance

Data & Digital Health · CHECKLIST · Version 1.0

A checklist for assuring the quality of routine surveillance data before you act on it.

Overview

Before a number changes a decision, it should be trusted. This checklist covers completeness, timeliness, and validity checks for routine surveillance feeds.

What's inside

A concise, scannable checklist for the moment it is needed
- Clear thresholds and trigger points
- Immediate actions and escalation routes
- Space to record decisions and rationale

How to use it

Keep it within easy reach and use it in the moment rather than from memory. Record the decisions you make against it so your reasoning is documented if it is ever reviewed.

About this collection

This document belongs to the Data & Digital Health collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
