THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Designing Accessible Digital Health Services

Data & Digital Health · GUIDE · Version 1.0

Guidance on building digital health services that work for everyone, including the digitally excluded.

Overview

Digital-first must not mean digital-only. This guide covers accessibility standards, assisted digital routes, and inclusive design for health services.

What's inside

A plain-language overview you can read in one sitting
• Step-by-step guidance with decision points called out
• Worked examples drawn from real community practice
• A one-page summary to keep at your desk

How to use it

Read it through once to orient yourself, then return to the relevant section when you need it. Share the one-page summary with colleagues who need the headlines rather than the detail.

About this collection

This document belongs to the Data & Digital Health collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
