THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Digital Inclusion Assessment Toolkit

Data & Digital Health · TOOLKIT · Version 1.0

A toolkit for assessing and addressing digital exclusion in the populations you serve.

Overview

This toolkit helps teams measure digital exclusion locally and design practical mitigations so digital services widen rather than narrow health inequalities.

What's inside

A set of practical tools you can use independently or together

- Checklists and templates for each stage of the work
- Facilitation notes for running sessions with your team
- An evaluation plan so you can measure impact

How to use it

Pick the tools that fit your context rather than working through everything mechanically. Run the facilitation sessions with the people who will deliver the work, and build the evaluation in from the start.

About this collection

This document belongs to the Data & Digital Health collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
