THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Ethical Decision-Making Framework

Safeguarding & Ethics · TOOLKIT · Version 1.0

A structured framework for working through ethically complex public health decisions.

Overview

When values conflict, a structured approach helps. This framework offers a defensible, step-by-step method for reasoning through ethically difficult decisions and recording the rationale.

What's inside

A set of practical tools you can use independently or together

- Checklists and templates for each stage of the work
- Facilitation notes for running sessions with your team
- An evaluation plan so you can measure impact

How to use it

Pick the tools that fit your context rather than working through everything mechanically. Run the facilitation sessions with the people who will deliver the work, and build the evaluation in from the start.

About this collection

This document belongs to the Safeguarding & Ethics collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
