THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Geographic Information Systems for Public Health

Data & Digital Health · GUIDE · Version 2.1

An introduction to using GIS and mapping to target public health action.

Overview

Maps reveal patterns tables hide. This primer introduces practical GIS techniques for targeting interventions, with examples using freely available tools.

What's inside

A plain-language overview you can read in one sitting
• Step-by-step guidance with decision points called out
• Worked examples drawn from real community practice
• A one-page summary to keep at your desk

How to use it

Read it through once to orient yourself, then return to the relevant section when you need it. Share the one-page summary with colleagues who need the headlines rather than the detail.

About this collection

This document belongs to the Data & Digital Health collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
