THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Making the Economic Case for Prevention

Policy & Advocacy · TOOLKIT · Version 1.0

A toolkit for building the economic case for preventive public health investment.

Overview

Finance colleagues respond to return on investment. This toolkit equips members with the frameworks, sources, and worked examples to make a credible economic case for prevention.

What's inside

A set of practical tools you can use independently or together

- Checklists and templates for each stage of the work
- Facilitation notes for running sessions with your team
- An evaluation plan so you can measure impact

How to use it

Pick the tools that fit your context rather than working through everything mechanically. Run the facilitation sessions with the people who will deliver the work, and build the evaluation in from the start.

About this collection

This document belongs to the Policy & Advocacy collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
