THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Measuring Reach & Equity in Outreach

Community Outreach · TOOLKIT · Version 2.1

A framework and indicators for measuring whether outreach is genuinely reaching underserved groups.

Overview

Counting contacts is easy; proving you reached the people who need you most is harder. This framework offers equity-weighted indicators and a simple dashboard layout to track them.

What's inside

A set of practical tools you can use independently or together

- Checklists and templates for each stage of the work
- Facilitation notes for running sessions with your team
- An evaluation plan so you can measure impact

How to use it

Pick the tools that fit your context rather than working through everything mechanically. Run the facilitation sessions with the people who will deliver the work, and build the evaluation in from the start.

About this collection

This document belongs to the Community Outreach collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
