Mental Health & Loneliness in Older Adults: Evidence Summary

Research & Evidence · RESEARCH · Version 1.0

A summary of the evidence linking social isolation, loneliness, and mental health in older adults.

Overview

This evidence summary brings together the research on loneliness and mental health in later life, and highlights which community interventions have the strongest supporting evidence.

What's inside

A clear summary of the evidence and its strength
• Key findings translated into practical implications
• An honest appraisal of limitations and gaps
• A full reference list for further reading

How to use it

Use the implications section to inform planning and commissioning conversations, and cite the references directly when you need to evidence a decision. Treat the limitations section as honestly as the findings.
