THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Open Data Sources for Population Health

Data & Digital Health · DATASET · Version 1.0

A curated directory of reliable open data sources for local population health analysis.

Overview

A regularly maintained directory of trustworthy open data sources, annotated with what each contains, its update frequency, and its known limitations.

What's inside

A curated, documented collection of sources
- Notes on coverage, update frequency, and limitations
- Guidance on responsible interpretation
- Links to the underlying data and licences

How to use it

Start from the coverage notes to confirm a source fits your question before you analyse it. Always carry the stated limitations through into how you present your findings.

About this collection

This document belongs to the Data & Digital Health collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
