THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Qualitative Methods for Community Health Research

Research & Evidence · RESEARCH · Version 2.1

A field guide to designing and analysing qualitative research in community health settings.

Overview

Practical guidance on interview and focus-group design, sampling, and thematic analysis, written for practitioners who need rigorous qualitative evidence without a full academic team.

What's inside

A clear summary of the evidence and its strength
- Key findings translated into practical implications
- An honest appraisal of limitations and gaps
- A full reference list for further reading

How to use it

Use the implications section to inform planning and commissioning conversations, and cite the references directly when you need to evidence a decision. Treat the limitations section as honestly as the findings.

About this collection

This document belongs to the Research & Evidence collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
