THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Type 2 Diabetes Risk Stratification Pathway

Clinical Guidelines · GUIDE · Version 1.0

A practical pathway for identifying, scoring, and triaging people at risk of type 2 diabetes.

Overview

This pathway brings validated risk scores together with referral criteria so teams can move people from a community screening event into structured prevention programmes. It includes worked examples and a one-page clinician summary.

What's inside

A plain-language overview you can read in one sitting
• Step-by-step guidance with decision points called out
• Worked examples drawn from real community practice
• A one-page summary to keep at your desk

How to use it

Read it through once to orient yourself, then return to the relevant section when you need it. Share the one-page summary with colleagues who need the headlines rather than the detail.

About this collection

This document belongs to the Clinical Guidelines collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
