THE INSTITUTE FOR COMMUNITY & PUBLIC HEALTH

Vaccination Pop-Up Clinic Operations Toolkit

Community Outreach · TOOLKIT · Version 1.0

Everything a team needs to plan, staff, and run a safe community vaccination pop-up clinic.

Overview

From venue risk assessment to cold-chain logistics and queue management, this toolkit turns the ambition of a community pop-up into an operational plan. It includes a staffing calculator and a same-day debrief template.

What's inside

A set of practical tools you can use independently or together

- Checklists and templates for each stage of the work
- Facilitation notes for running sessions with your team
- An evaluation plan so you can measure impact

How to use it

Pick the tools that fit your context rather than working through everything mechanically. Run the facilitation sessions with the people who will deliver the work, and build the evaluation in from the start.

About this collection

This document belongs to the Community Outreach collection of the ResourceVault library and is provided as a demonstration document for evaluation purposes.
